Screening for Sleep Apnea

Have you ever been told that you snore?

Have you ever been screened for Sleep Apnea?

80 million Americans snore and 70% of the time, loud snoring is indicative of Sleep Apnea.

Untreated Obstructive Sleep Apnea (OSA) can lead to the following problems:
Acid Reflux (GERD); Morning Headaches; Diabetes
High Blood pressure; Sexual Dysfunction
Memory Problems – Alzheimer's / Dementia
Dental Symptoms (Abreactions from nocturnal bruxism); Teeth grinding; Sore jaw muscles
Nocturia; Heart Attack; Stroke; Depression
Chronic fatigue syndrome; Fibromyalgia

Sleep Apnea increases risk of death by 46%

We Screen for Sleep Apnea and make Oral Appliance
